

## **Sprint 3 Report Share Yourself Artists Web Team 02/17/19**

### **Actions to Stop Doing**

We are not keeping an accurate scrum board with up to date user story classification. Try to be on time for our SCRUM meetings and TA meetings; however, for the most part everybody does eventually show up, but it has been a consistent minor problem. During the meetings, we need a more structured meeting, to prevent from working on too many different things at one time. Having a weak form of communication with the project owner, seems like we have a way to communicate with them but we have to wait until a weekly meeting before we get the full story of everything that makes user stories we completed become uncompleted because of changes that were not discussed. Try not to overload ourselves for each sprint with tasks and assign more members to each task can be completed faster.

### **Actions to Start Doing**

For this sprint, we will start keeping the trello scrum board up to date with everything that we are working on. At the moment it is updated irregularly. We also have to create the burn-up chart for this week's sprint plan, which we have not done yet. We are also not testing our functions towards the end of our sprint which we really need in order to make the code production level ready. We have to make a regular habit of keeping the repo updated with the changes we make to our project. We probably should make an effort to make some comments to code so when others use it they are not completely lost on the functionality of it. We also need to make an effort to managing and maintaining the repo.

### **Actions to Keep Doing**

We have been communicating extremely well. First, we established slack as our main method of communication where all members and Scott participate in and the chat is active daily. If we keep this up, our communication will be right where we want it. Also, we are doing very well with coordinating extra meeting times as everyone seems to be able to work with the proposed times, thus we should continue these group meetings.

times where we can code together and discuss further plans. We continually have been linking each other helpful resources, in order for us to learn the necessary skills cohesively.

### **Work completed/not completed**

#### **Completed:**

- 12 most recently submitted art is now visible
- User can now submit with premium credits
- As a user, you can now upload no matter which upload paths you take. (Multiple vs single blog choices)
- When a user selects “mark as read” the page automatically refreshes.
- Businesses can now see all submissions and categorize them.

#### **Not Complete:**

- All user stories are complete.

### **Work completion rate**

The total number of user stories completed during the prior sprint was 7. As a team, we spent 52 ideal hours working on our tasks. In total, we spent our time working on our tasks across 6 days. We completed 1 user story a day and worked on average 8.66 hours a day. Our cumulative progress has been 152 hours over the course of 20 days, which comes out to 7.6 hours per day.
