RELEASE PLAN

SHARE YOURSELF ARTISTS

Team : SYA Web

Release Name : Share Yourself Artists

Release Date : 01/24/19

Team Members :

Yasunori Iwayanagi (Product Owner)

Kavan Samra (Scrum Master)

Michael Hsieh

Patrick Toral

Darren He

Christopher Hahn

High Level Goals

- All members should learn main technologies i.e Vue, Firebase.
- Fix existing bugs and make sure current functionalities behave correctly.
- Create a system to recommend artists to other artists.
- Implement a functional comment chain system
- Implement an album system for the artist dashboard

User Stories

- Sprint 1 - (Total story points : 54)
    - As a developer I need to get familiar with the codebase and learn the technologies necessary to fix bugs and add new features to the project. (16)
    - As a user I want to see the contact support email, so then I have a method of contacting someone for support if needed. (1)
    - As a user, I want to see an alert for submitting my art piece and get redirected to the artist dashboard so then I have an alert for knowing if my submission was successful. (12)
    - As a user, I would like to see the date/time format on the chat, so I know more precisely when events occurred. (4)
    - As a user, I want to see the types of credits I have, so that I can spend my credits appropriately. (6)

- ○ As a user, I want to see the image I uploaded before clicking "Next" , so then I can verify what image I am going to submit. (7)
  - ○ As an artist, I want to receive 2 more free credits each week so that I can use the site without always having to pay. (8)
- Sprint 2 - (Total Story Points: 65)
  - ○ As a user, I want a toast message when my art piece is uploaded, so that I can detect any potential upload errors before I am redirected to my artist dashboard page. (9)
  - ○ As a user, I want to be asked which account I want to be asked to log into, so that my account security is increased and I am logged into the right account. (11)
  - ○ As a user, I want to be able delete art pieces that already exist on the dashboard. (16)
  - ○ As a business account user, I would not want an artist user to be able to visit a business dashboard. (6)
  - ○ As a user, I want to see consistent format when viewing related data to my account. (6)
  - ○ As a user, I want to see my profile picture consistently across the website. (14)
  - ○ As a user, I would like to not be able to upload invalid images and have a nice-looking alert if invalid image. (10)
  - ○ As a user, I would like to receive a refund if a business does not respond to my review request after 48 hours. (4)
  - ○ As a user, I would like my default page to be consistent, either the dashboard if signed in or the homepage if signed out. (11)
  - ○ As an admin, I would like for images that are uploaded to be a certain size limit, so then we do not get images that are too large in resolution (12)

- Sprint 3 -(Total Story Points: 71)
  - ○ As a user, I'd like one submission pathway, so it is less confusing to submit my art piece (13)
  - ○ As a user, I'd like to see the sidebar on the right updated correctly, so then I can see who the 12 more recent submissions were. (11)
  - ○ As a user, I'd like to be able to use my premium credits, so then I can pay to submit my art piece. (14)
  - ○ As a user, I would like to immediately see my read/unread responses update when I click "mark as read", so then I don't have to click the refresh button every time (5)
  - ○ As a business user, I would like to see submitted art pieces categorized, so then I can better manage my responses to these art pieces (14)
  - ○ As a business, I would not like to see freebie/premium credits, because I have no need for them. (7)

- ○ As a business, I would like to see all the submissions that I've received, so then I can promptly respond. (7)

- Sprint 4 - (Total Story Points: 57)
  - ○ As a user, I'd like to have three tabs: my submissions ,recommended, and recently responded to submissions, so that I can keep track of my submissions and also inspect other artists works (10)
  - ○ As a user, I'd like to filter my art by category, so that I can view the organized art pieces on my dashboard (7)
  - ○ As a user, I'd like to see consistent user information across the whole platform, so that my information is accurately represented (6)
  - ○ As a user, I would like to see the data in the chat in chronological order, so that I can chat with other users on the website effectively. (10)
  - ○ As a user, I would like to be asked for confirmation when I press delete on my art, so that I don't accidentally press the delete button and have no safeguard. (8)
  - ○ As a user, I would like to be able to click on the username on the right side bar and be taken to the users dashboard as well as be able to click the art piece and be taken to that specific art page, because I would like to be taken to that page to view the art piece. (6)
- Sprint 5 (Total story points :80)
  - ○ As a user, I'd like to have three tabs: my submissions, recommended, and recently responded to submissions, so that I can keep track of my submissions and also inspect other artists works. (23)
  - ○ As a developer, I'd like to start on fixing my components responsiveness, so that users can enjoy our website with any device (14)
  - ○ As a user, I would like there to be a delete button in the reviews page for users who are artists, so that I can get rid of review I do not want to see. (13)
  - ○ As a user, I'd like to have my image resized if it's too big, so that I can still upload my art to the website. (6)
  - ○ As a user, I would like to not have to type in my name when submitting an art piece so that I can save time by not giving out information that the website already has. (4)
  - ○ As a user, I'd like to have a bigger preview image, so that it's more convenient and consistent when I am uploading an image. (4)
  - ○ As a user, I'd like to see a spinner when uploading a profile picture, so that I know my upload process is running. (7)
  - ○ As a user, I'd like a forgot my password option, so that I can recover my account. (6)
  - ○ As a user, I'd like a delete button when I use my categories filter on my artist dashboard, so that I can delete an art piece after filtering my art pieces. (8)
- Sprint 6 - (Total story points 63)

- As a developer, I'd like to improve the existing recommendation system for artists, so that the list more accurately displays the right artists. (21)
- As a developer, I'd like to start on fixing my components responsiveness, so that users can enjoy our website with any device (14)
- As a user, I'd like to be able to cancel an upload profile image process and have the spinner update accordingly, so that I can choose a new file to upload. (13)
- As a user, I'd like to have my image resized if it's too big, so that I can still upload my art to the website. (12)
- As a user, I'd like to click the delete button and mark as read button once, so that won't have to do it twice and thus the process will be more convenient. (13)

Product Backlog

1. Comment Chain to respond to art pieces
   a. Currently, users are able to comment on art pieces, but it does not display.
   b. We would like to implement a nice UI where users can upvote, downvote and display the number of likes/dislikes.
2. Business Statistics
   a. Statistics for how many artists get responded to
   b. Statistics available to artists describing the likelihood of an artist getting responded
3. Album System
   a. Be able to group pictures into a single portfolio for artists to organize their collection
4. UI and Bug Fixes
